

Engineered Systems Solutions

Ski Industry can “Consider it solved” with Emerson systems

“If it isn’t broken, don’t fix it,” doesn’t apply to the ski operator. Too much is at stake to chance an accident, or endure an equipment failure in the middle of the season. A drive retrofit solution from Emerson and SafSkiSystems on lift, snow-making and other equipment can help insure a successful season by improving safety, up-time, and reliability.

Insuring a successful retrofit is our promise. With over 50 years of building AC and DC drives, and retrofitting systems for the ski industry, Control Techniques, Saftronics, and Fincor have the experience and the products to meet and exceed customer expectations.

Get the Emerson People Advantage

- Worldwide experience in applying AC and DC variable speed drive systems in the ski industry
- A highly trained support network of electronic, electrical and mechanical engineers located in 50 Drive Application and System Engineering Centers, 12 in the U.S. and Canada
- Field service specialists with expertise in lift and tram dynamics, power systems, low voltage systems, pumps, compressors, and ANSI B77.1

The Installation “Friendly” Retrofit Solution

*Just as you can expect smooth operation of your lifts and trams, and trouble-free performance of your snowmakers when retrofitting with Emerson, you can also expect the retrofit itself to go smoothly and be problem free. Customers coming to Emerson for solutions, can always...
Consider It Solved.*

Testing a retrofit drive installation

Get the Emerson Product Advantage

- Complete Range of Soft Starters, AC and DC drives (230V to 690V drives to 2,900 hp) from the leader in intelligent drive systems, backed by industry-best warranties and Emerson
- Rugged drives, controls and panels with easy-to-use touchscreens and keypads, intuitive software, and real-time diagnostic tools
- Redundant safety systems for maximum protection
- Fully compliant with ANSI, State Tram Board Regulations, and CSA (Canada) at time of manufacture
- The industry’s best drive warranties, coupled with 24/7/365 field service and support, and on-line and toll-free support

For additional information on new or retrofit solutions for the ski industry, call 800-893-2321 to reach the Drive Center nearest to your location, or contact:
