

Upgrade Solution

What is a High HP CDE (HPCDE)?

The HPCDE was specifically designed for variable torque applications, such as pumps or fans while delivering significant reductions in energy costs.

It was available in several models that could control 3-phase induction motors from 1 to 250HP. The input voltage ranged 208 to 230VAC or 380 to 480 VAC +/- 10% , three phase.
